
B_1
Fourier series, $f_t = 0.074$
B_2
seed 5, $f_t = 0.998$
B_3
seed 0, $f_2 = 0.520$
(a) $\bar{u}/U_{\mathrm{ref}}$
[−0.703, 0.733]
[−0.027, 0.042]
[−0.469, 0.595]
$\bar{u}/U_{\mathrm{ref}}$
(b) $\bar{v}/U_{\mathrm{ref}}$
[−0.429, 0.179]
[−0.012, 0.014]
[−0.232, 0.123]
$\bar{v}/U_{\mathrm{ref}}$
(c) $u'_{\mathrm{rms}}/U_{\mathrm{ref}}$
max = 0.073
max = 0.555
max = 0.416
$u'_{\mathrm{rms}}/U_{\mathrm{ref}}$
colour = $u'_{x,\mathrm{rms}}$, the same quantity in the three panels
B_1 Fourier series, $f_t = 0.074$
B_2 seed 5, $f_t = 0.998$
B_3 seed 0, $f_2 = 0.520$
y/L
(d) $\bar{u}(x = \frac{1}{4}, y)/U_{\mathrm{ref}}$
x/L
(e) $\bar{v}(x, y = \frac{1}{2})/U_{\mathrm{ref}}$
shaded band $\bar{u} \pm u'_{\mathrm{rms}}$: temporal standard deviation at fixed (x, y), over 64 forced periods. It measures temporal variability and is not a confidence interval.
