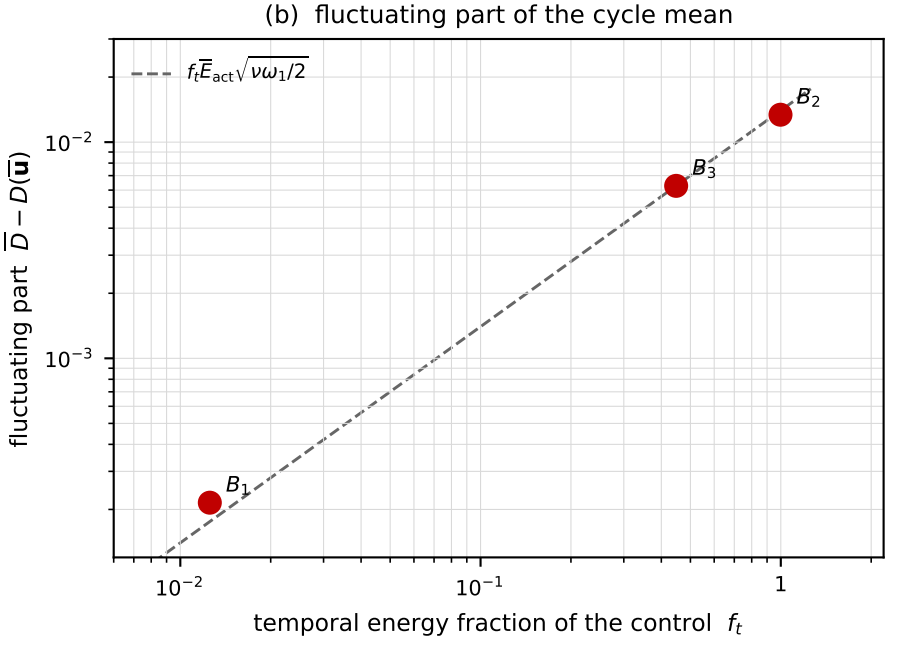
(a) the two functionals of the same flow
dissipation $[\nu U_{\mathrm{ref}}^2/L]$
10^{-2}
10^{-3}
$D(\overline{\mathbf{u}})$, mean-field functional
$\overline{D}$, cycle mean
range of the stationary controls
Uniform lid
$k=1$
$k=2$
B_1 profile
B_1
B_2
B_3



(b) fluctuating part of the cycle mean
$f_t\overline{E}_{\mathrm{act}}\sqrt{\nu\omega_1/2}$
fluctuating part $\overline{D}-D(\overline{\mathbf{u}})$
10^{-2}
10^{-3}
B_1
B_2
B_3
10^{-2}
10^{-1}
1
temporal energy fraction of the control f_t
